EXAMINER'S ACTION

Art Unit: 2602

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. It is noted that throughout the claims, applicant recites the term "QAM" in an alternating font (note for example lines 2 and 7 of claim 2). Though it's not a cause for an objection, applicant may prefer to keep to one font for consistency, unless the two are used for a reason.

3. Claims 1-17 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 5 of claim 1, applicant refers to the QAM signal as a "complex-amplitude-modulation" type although it is well known that the Q stands for quadrature. (It is noted however that throughout the rest of the disclosure including the claims, quadrature is recited).

4. Claims 1-22 are allowable over the prior art of record.

Art Unit: 2602

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note particularly Takahashi and Reeve, III.

The prior art does not suggest switching between a QAM and a VSB signal for HDTV reception using a common tuner.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor R. Kostak whose telephone number is (703) 305-4374.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 305-4700.
